All social areas of the condos, will be overlooking the conservation area, which guarantees green views and also total privacy. Floor to ceiling windows allow the entry of natural light and an incredible view of the jungle. Each apartment has a pool and terrace, surrounded by jungle and in a private area. All floor are chukum type both inside and outside, which gives the project a very authentic "local" touch. The carpentry is a combination of rustic materials, we combine concrete, wood and steel in a "minimalist" design achieving efficient furniture and with an appearance totally out of the ordinary. The pools are finished in light tones which give the water a turquoise color that resembles the tone of the cenotes in the area. The combination of all these materials creates spaces really cozy and luxurious. Bathrooms offer sinks

with mixers of Mexican design leaning on wooden decks. The finishes of each home have been carefully chosen to blend in with the environment that Tulum offers. Thinking about comfort and luxury we have chosen Travertine marble floors combined with floors of Natural wood, to give a touch of warmth. For outdoor areas we use handmade pasta floors made in the region, Braza stone, and wood creating a proposal of contemporary architecture exquisite in colors and textures. Within our amenities we have a pool in chukum finish with more than 25 linear meters inside the reserve. Lounge chairs area, snack area with W.C, outdoor shower, barbecue and service bar.
